

The Garofalo difference

The Drying Process:

The Triad Drying Process of adjusting drying length and temperature for each cut is applied during production to ensure consistency and quality across all Signature pasta offerings.

Bronze Dye

The Signature line offers traditional Neapolitan cuts, most of which are created using traditional bronze dies to ensure that the integrity of each cut's texture is preserved.

The Finest Raw Materials:

Semolina wheat used to create Garofalo Signature pastas must meet the highest standards for protein content and color quality to guarantee a product with superior aesthetic and flavor.

Quality Control

Garofalo performs over 25 quality checks on each of its Signature cuts and runs all standard industry controls twice to ensure unmatched quality for its Signature line of pastas.
